Technical Area

Introduction

Technical and Management Support for Thematic Councils (Getec) forms part of the Department for Advocacy and its mission is to lead articulation processes, negotiations and represent industry interests to expand national and international competitiveness.

In line with the mission of FIERGS and CIERGS, Technical and Management Support for Thematic Councils (Getec) acts in the development of state industry, focusing on external themes and factors that influence companies' competitiveness, such as: the environment, foreign trade and international relations, tax, economic, labor and social welfare legislation, infrastructure, fostering innovation and technology and parliamentary articulation.

It provides support for the activities of FIERGS' and CIERGS' Thematic Councils and monitors external representations on interest in industry forums.
